El tratamiento para el control de bacterias es de tres aplicaciones foliares con una frecuencia de 7 días entre aplicaciones.
 Las aplicaciones al suelo de Trichobiol y Best Ultra S, mezclar con Fulvimax Alga+ en relación 1:1.
 Se sugiere la adición de K boron Ca para todas las enfermedades foliares. Rotar los productos de ser necesario
 Todas las aplicaciones foliares se recomienda la adición de Kactuz AD a una dosis de 0.5 L/ha, ajustar el pH de la solución a aplicar con Azidol Orgánico en un rango de 5.5-6.5
